

Conservation Security Program:

2006-01 Sign-up

The Conservation Security Program (CSP) is a voluntary conservation program that supports ongoing stewardship of private, working agricultural lands by providing payments for maintaining and enhancing natural resources. CSP identifies and rewards those farmers and ranchers who are meeting the highest standards of conservation and environmental management on their operations.

In addition, CSP creates powerful incentives for other producers to meet those same standards of conservation performance. In short, CSP rewards the best and motivates the rest. Through these rewards and incentives, CSP builds a foundation of natural resource conservation that will provide benefits to the public for generations to come.

Watershed Approach

The Natural Resources Conservation Service (NRCS) is using watersheds as a basis to determine CSP participation. This makes sense economically, practically, and administratively.

Watersheds are nature's boundaries and are the best science-based way to group together producers working on similar environmental issues.

The budget for CSP in fiscal year 2006 is \$259 million. Focusing on selected watersheds reduces the administrative burden on applicants and reduces the costs of processing a large number of applications that cannot be funded. The law requires that NRCS not incur more than 15 percent technical assistance costs associated with CSP.

2006 Watersheds

In fiscal year 2006, CSP will touch 60 watersheds (one or more in every State, the Caribbean area and Guam), 380 counties, and about 380 local conservation districts. Combined, these watersheds include more than 62 million acres, an area about the size of Oregon. More than 75,000 farms and ranches are within these watershed boundaries and they cover more than 25 million acres, an area about the size of Kentucky. About half of this working agricultural land is cropland and half is grazing land.

A map showing the locations of the watersheds is online at:

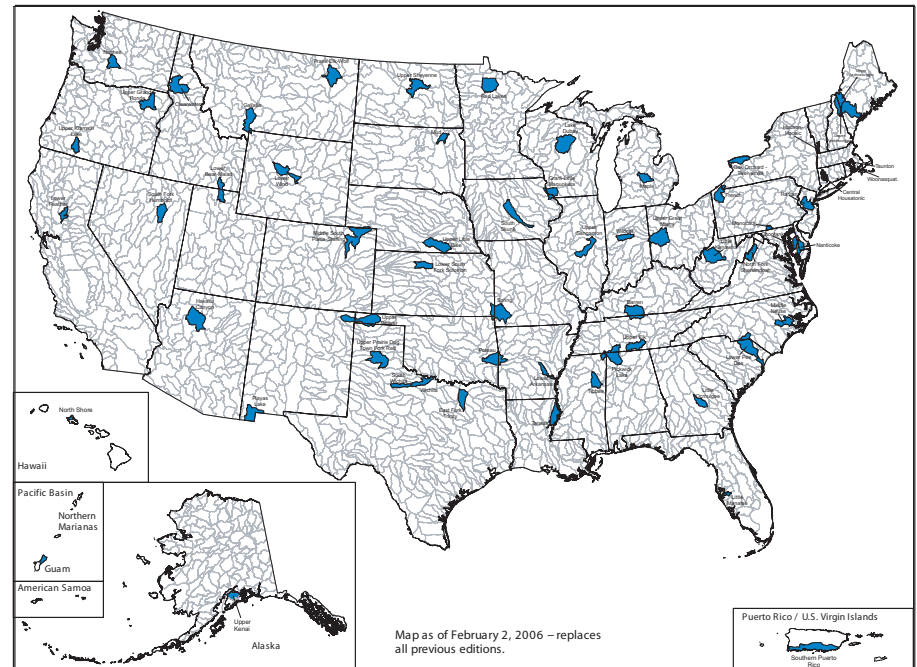

<http://www.nrcs.usda.gov/programs/csp/>

Watershed Selection

NRCS used several criteria for selecting the watersheds to participate in CSP, including:

- Contain a variety of land uses (crops, rangeland, pasture, vineyards/orchards) and input intensities.
- Have high-priority resource issues to be addressed, including issues that meet State priorities.
- Have a history of good land stewardship on the part of landowners.
- Have the technical tools necessary, such as digitized soils information to streamline program implementation.
- State-level input was provided by NRCS State Conservationists to integrate State resource priorities into the watershed selection process.

CSP Watersheds: 2006-01 Sign-up February 13 to March 31, 2006

Watersheds also were evaluated from a national perspective regarding regional resource issues that would enhance CSP's overall environmental goals. Preference was given where improving resources would assist the recovery of threatened and endangered species or add measurably to critical resource recovery efforts and extensive watershed-wide measures already in place.

Other watersheds will be selected each year until landowners in every watershed have had a chance to participate. Every agricultural operation is in a watershed.

How To Participate

1. Access the CSP self-assessment workbook either online at the address below, or by getting a hard copy at the local USDA Service Centers within the watersheds.
2. Using the workbook, producers (1) determine whether they meet basic eligibility requirements, (2) document their stewardship work to date, and (3) prepare a benchmark inventory documenting conservation they have undertaken so far.
3. Submit the completed self-assessment workbook to the local NRCS office during the sign-up period.
4. Meet with NRCS personnel to go over any additional needed documentation.
5. NRCS determines the enrollment category for which the producer qualifies.
6. Finally, NRCS will select the categories to be funded for CSP contracts.

All CSP applications that meet sign-up criteria will be placed in an enrollment category regardless of available funding. In addition to legal contract requirements, the categories will consider the applicants' current stewardship (soil condition, tillage intensity, existing practices, and activities) and will sort producers based on these factors. Categories also will examine producers' willingness to perform additional conservation activities during their CSP contract.

For More Information

For additional information about CSP, contact your local USDA Service Center, listed in the telephone book under U.S. Department of Agriculture, or your local conservation district. Information also is available on the Internet at:

<http://www.nrcs.usda.gov/programs/csp>

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
